SUBSEA FORUM

CALL FOR SPEAKERS

The AOG Energy 2022 Subsea Forum is Australia's premier meeting place for subsea professionals. Addressing trends, challenges and opportunities in the local market, this free three-day dedicated conference stream has been built by the industry, for the industry.

As the world emerges from the effects of the pandemic, the global oil and gas sector has seen a steep drop in project investment and has focussed on cost saving measures. Australia is recognised as a world leader in LNG and continues to develop and engineer many innovations in offshore energy production. Industry trends indicate there will be increased focus on cost efficiency, remote operations and net zero targets.

The subsea sector continues to adapt and will play a critical part in delivering solutions in these and many more areas as the subsea sector finds itself once again calling upon its innovation and ingenuity to demonstrate its value to industry.

How we work has changed and is likely to be different for many years to come, the energy landscape is evolving with increased focus on reduced emissions and energy transition. The future brings many challenges, and with that brings many opportunities, new projects and operations will demand smarter, more efficient ways of working whilst managing to maintain a focus on the environment.

As Australia's energy industry continues to mature and grow in the global landscape, opportunities arise for companies that can deliver added value through services and technologies in project execution and IMR (inspection, maintenance, and repair).

**SUBMISSIONS DUE :
30 SEPTEMBER 2021**

Topics

- Innovation in subsea pipelines
- Cost efficient subsea developments
- Remote systems and communications
- Autonomous operations and artificial intelligence
- Subsea control systems and digital twins
- Pipeline innovation and technology
- Digital acquisition and analytics
- Renewables - offshore wind and legislation
- Energy transition in subsea – CCUS & Hydrogen
- Late life planning and decommissioning

Evaluation Criteria

- Submissions referring to case studies will be highly regarded
- Prior to submission, company and joint venture clearance must be obtained. Any perceived problems concerning clearance should be outlined when the paper proposal is submitted
- Ideally your submission will not have been presented before and should contain new information

Thanks to the generosity of our hosts and sponsors, delegate attendance will be complimentary.

Submission queries and sponsorship opportunities to Melissa Clendinen mclendinen@divcom.net.au
